

TokenMenia

World's 1st token backed by
Cryptocurrency Mining

WHITEPAPER

Version 1.0

www.tokenmenia.com

Introduction

Danismanlik Hizmetleri kernPC Company is a trading company that has a very strong identity for both customers and the market. The year 2024 is a transformative year for our company; and as we update our visual identity as part of Web 3.0 , and promoting certain defi tokens and providing financial freedom through staking and holding.

Danismanlik Hizmetleri kernPC Company has launched tokenmenia platform where a users can buy tokens and hold and earn healthy money. The Project brings in an innovative business model allowing investors to capitalize on the crypto awareness and opportunity with the rise of blockchain markets, without dealing with hurdles, risks, and technical barriers.

Mission

Our mission is to extend the rewards of staking to a global community of individuals driven by the potential of the bright mining future. We aim to make this possible through our state-of-the-art infrastructure capabilities by building an open and shared community to promote (IPO) tokens.

Our ambition is to reach a target of staking10 Bitcoin daily in a span of one year. Imagine a time when this aspiration is achieved, and it supports tokens liquidity and market cap.

As phases progress, we aim to create a marketplace that integrates NFTs, the Metaverse, thereby developing a cross-chain ecosystem.

Our goal is to empower every individual and every organization in the blockchain ecosystem to achieve more through a bright and progressive mining framework, and by harnessing the power of Web3 for a decentralized future. To provide value to the community through content and experiences like defi projects that aid the development of the Metaverse.

Token menia Vision

Token menia is the brainchild of extraordinary people with a vision to extend the benefits of mining to individuals. A vision born out of the willingness to create growth opportunities for millions who are waiting to participate in this fast-growing promoting tokens, but have been held back because of the costs involved, technical support and maintenance.

We are using our knowledge and experience of the mining industry to build an ecosystem that enables people to use blockchain technology by using qtm token.

The vision of the token menia is to inspire a wider audience in crypto mining by taking strategic steps towards sustainable growth. The vision is to leverage the latest blockchain technology, web3.0 and set up the mining infrastructure across the world.

Token menia will continue to innovate itself with the goal of offering its users the best experience. As part of our growth strategy, Token Menia is planning to continue developing various use cases for qtm token holders as outlined in the roadmap.

Safeguard against pump and dump of token value

Existing token mechanisms have a lot of room for error. Pump and dump, whale buying, needing liquidity up front, and bot interference are the main points of failure.

These failures open opportunities for ingenuine ways to design a token distribution model like that of qtm. QTM token structure is defined to minimize volatility and prevent front-running and price speculation by adjusting the weights down during a token launch. Our token distribution mechanism creates more equitable and fair token distribution events. Our planned roadmap to add liquidity adjusts its weight over time to create a constant price, minimizing volatility, and

preventing frontrunning and price speculation.

QTM idea is that a team should be able to build liquidity without large amounts of upfront capital, and that a team should be able to design a token sale mechanism that fits their specific funding goal.

In addition, it is- our belief that distribution of tokens and liquidity provision should be separate from token price changes. Different from bonding curves, tokens should be distributed even if their unit price stays constant.

Benefits to the Token Holder's

Staking Benefits

Our investors passively can earn high APY by staking qtm and others tokens. We designed our ecosystem as the best platform to generate high-yield returns of up to 24% on staking of qtm tokens using high-grade protocols. qtm token and others provide a highly secure yield enhancement model for early investors to earn high returns on their staking.

The principal amount will always be safe in the token menia, investors will be able to cash out their rewards on a monthly basis and they can withdrawal whole amount every week from tokenmenia.com website until the token list on exchange.

Tyes of Tokens	APY	Payout
Public Tokens	Depends upon owner's of the token	weekly
Binance Tokens	Upto 4%	weekly
Tokenmenia own projects	Upto 30%	monthly(minimum \$30)
